Why should you choose ANC?

- **Guaranteed four-hour response time.**
- **Down time will be eliminated.** ANC will install remote access support that will enable ANC to immediately access your system whenever necessary. When an on-site call is required ANC will make prompt arrangements to service your systems.
- **Superior disaster recovery.** According to government statistics, 93% of companies that have trouble restoring their data after a disaster are out of business within 18 months. **ANC will help you implement a plan that will allow you to recover and restore your data in just a few minutes** utilizing Double-Take Software products and services. Double-Take replication technology reduces the window for data loss, is more efficient than tape, and less costly than tape or other replication solutions. Because Double-Take replicates data in near real-time, an up-to-the-second copy of data is always available on the back up server (www.doubletake.com).
- **Securely obtain e-mail remotely from any Internet access site and/or your PDA.** ANC can also set up remote access over a secure Virtual Private Network (VPN) to allow designated users to access your system and its applications.
- **Inexpensive contracts.** ANC will keep you up-to-date with the latest service packs, patches, antivirus and anti-spyware technology, as well as address any issues that may come up with your equipment.
- **REPUTATION.** Above all, ANC prides itself on its reputation. What sets ANC apart from other consulting firms, more than anything else, is the praise we have received from our current clients. Feel free to contact any of the companies listed below to discuss the quality of our work:
